Evacuating Humanity from Education

... the production of human waste has all the markings of an impersonal, purely technical issue. The principal actors in the drama are 'terms of trade', 'market demands', 'competitive pressures', 'productivity' or 'efficiency' requirements, all covering up or explicitly denying any connection with the intentions, will, decisions and actions of real humans with names and addresses.

(Bauman, 2004:40)

Real People? Human Waste?

When Maggie X died, the (aged care) home decided that her savings of £450 was insufficient to pay for the funeral and asked the council to pay it. It refused and the owner of the home appealed to the Local Ombudsman. In his comments to the latter, the Council Chief Executive wrote that 'without wishing to appear insensitive, one could argue that from a commercial viewpoint residents of a home are its income producing raw material. Ergo, from a purely commercial view, deceased residents may then be regarded as being waste produced by their business'. Since, he continued, the resident's body was 'controlled waste likely to cause pollution of the environment or harm to human health' the home had, under definition of controlled waste as defined by the Environmental Protection Act, 'a specific duty' to dispose of the remains. Disposal, under the definitions of the Act, was a 'business cost'.

*What is meant by institutions? They are an organised fiduciary, organised trust, organised belief, **a collective fiction recognised by belief and thereby becoming real.** Clearly, to say of a reality that it is a collective fiction is a manner of saying that it has a tremendous existence, **but not as people believe it exists.***
