GROUTING

COLOUR:
Choose the colour very carefully!
Grout will dramatically influence the finished look of your piece- for better or for worse! If you can't decide, rather make up a sample tile and grout that in the colour you think might work...

◀ LIGHT? DARK? BRIGHT OR NEUTRAL? ▶
What areas of your piece do you want to unite, and what areas do you want to separate?

TRANSPARENCY: ▶
Some natural stone is porous and will absorb the colour of the grout used. Same applies for tiles or glass beads that are transparent.
